- **Italy – Reclaiming beaches**

# Dredging application

- **Azerbaijan – Submersed pipe lines**

- **Europe - Harbour Dredging**

## Mining application

### Application:

- Pumping tailing material

- Pumping bituminous sand

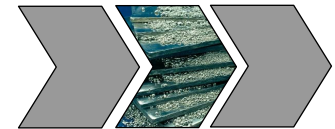

- Settling and collection ponds

### Potential clients:

- Mining companies
- Treatment of mineral tailings companies
  - Precious metal
  - Base metal
  - Industrial minerals

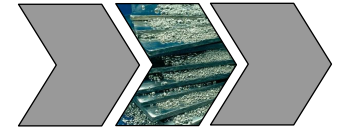

- Mining companies
- Oil and energy companies

- Mining companies
- Treatment of mineral tailings companies
  - Precious metal
  - Base metal
  - Industrial minerals

**Mining**

# Mining application

- **South America – Pumping Tailing materials**

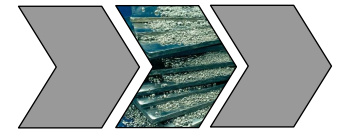

- **Canada - Pumping Bitumen**

# Mining application

- **Asia - Settling and collection ponds**

- **Asia - Tailing reclamation**

## Industrial application

### ■ Application:

- Pumping dust mixture

- Transfer bentonite slurry

### ■ Potential clients:

- Marble industries
- Paper mills
- Foundry
- Sugar refinery
- Chemical industry
- Watermaster treatment plants

- Construction companies
- Drilling companies

**Industrial**

## Industrial application

- Austria and Spain – Dust mixture: washing inerts

- Italy and Germany – Transfer bentonite slurry

## Company profile and experience

Dragflow, **tailor made solution** for heavy duty jobs!

**Dragflow S.r.l.** was born at the end of the 80's as manufacturer of submersible pumps with agitator for **heavy duty** specifically designed for the treatment of slurry with a high content of abrasive solids. Thanks to the **passion and brilliance** of its team Dragflow has proved to be a certainty for clients operating in **extremely specialized sectors** who must face and solve very difficult applications.
